

Loop Detector

Part Number: 112723.0001.S

Description

Induction loop vehicle detector

Features

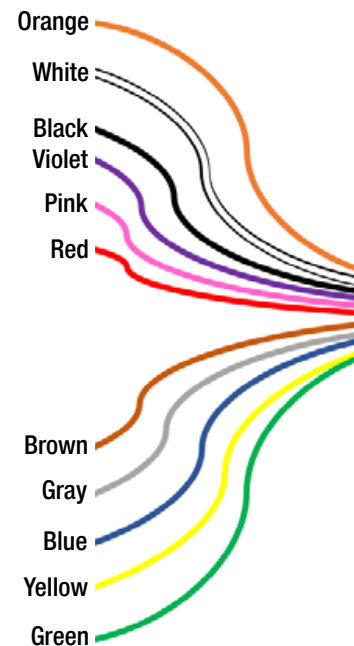

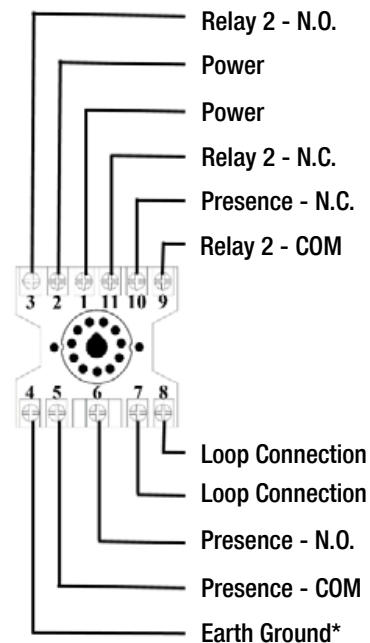

Variable Sensitivity
Variable Frequency
Anodized Aluminum Housing
Multiple Detection Settings

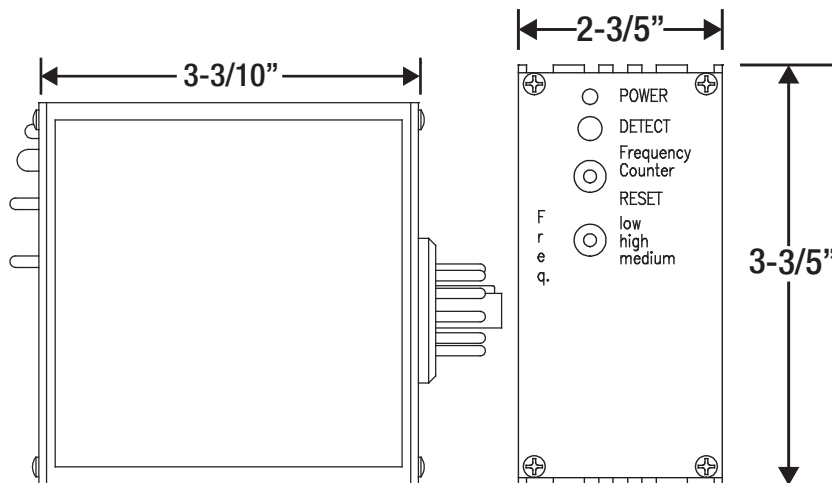

Specifications

Power Requirements: 12-60 VDC or 12-240 VAC
Current Draw: 19.2 mA
Operating Temperature: -40°F to 180°F

Wiring Information

Technical Drawings

*Must be connected to approved earth ground for surge protection to be effective
